

# Slat Filler Change Part Carts

Thomas Packaging designs and manufactures change part carts for all models and sizes of slat fillers. Change part carts improve efficiency for changeovers and assist with transporting parts to and from washing stations.

Carts can be completely customized to fit your specific needs. The overall cart dimensions, number of shelves, materials of construction, door style, etc. can all be specified for each application. As standard, the carts are designed to hold one set of slats, an upper and lower manifold and an upper and lower brush. All materials of construction are FDA-approved and the design is optimal for durability.

Contact Thomas Packaging today to assist with your change part storage.
